

'Z' = variable according to wind zone, please refer to table 7 E2/AS1

Viking Roofspec recommend that the membrane extends across the top of the parapet and down the front face of the cladding

The top of the parapet substrate, must be angled to allow water to run off the top of the parapet  
 \*If no metal cap is to be used, then a 10° slope to the top of parapet is required. Refer E2/AS1 6.5(a)

All fixings for the cap flashing, must be sealed and through the side of the flashing.

NOTE: Where Parapet meets wall refer ENV\_40A

NOTE:  
 Substrate to comply with current Viking Roofspec Masterspec specification  
 Substrate Checksheet available from [www.vikingroofspec.co.nz](http://www.vikingroofspec.co.nz)

DRAWING TITLE
Viking Enviroclad Parapet_with overflow

NOTES:
* Angle fillets are not required at upstands for Enviroclad * All fixings, cladding and structure are indicative only unless notated

  
 CODEMARK™  
 Cert # GM-CM30058

Enviroclad systems are CodeMarked
