**Hazard Identification** 

## **NZ** Approval

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002515, Aerosols (Flammable) Group Standard 2020 ). The substance has been classified as hazardous according to the criteria in the Hazardous Substances (Hazard Classification) Notice 2020.

### **GHS 7 Classes**

Flammable aero

Eye irritant cate Skin sensitiser c STOT\* single ex Chronic aquatic

#### **Hazard Statements**

2

osol category 1	H222 - Extremely flammable aerosol.
	H280 - Contains gas under pressure; may explode if heated.
egory 2	H319 - Causes serious eye irritation.
category 1	H317 - May cause an allergic skin reaction.
exposure category 3	H336 - May cause drowsiness or dizziness.
c category 2	H411 - Toxic to aquatic life with long lasting effects.

\*STOT - System target organ toxicity

## **Other Classifications**

There are no other classifications that are known to apply.

<b>Precautionary S</b>	tatements
Prevention	<ul> <li>P102 - Keep out of reach of children.</li> <li>P103 - Read label before use.</li> <li>P210 - Keep away from ignition sources. No smoking.</li> <li>P211 - Do not spray on an open flame or other ignition source.</li> <li>P251 - Pressurized container: Do not pierce or burn, even after use.</li> <li>P261 - Avoid breathing vapours/spray.</li> <li>P264 - Wash hands thoroughly after handling.</li> <li>P271 - Use only outdoors or in a well-ventilated area.</li> <li>P272 - Contaminated work clothing should not be allowed out of the workplace.</li> <li>P273 - Avoid release to the environment.</li> <li>P280 - Wear protective gloves/eye protection/face protection.</li> </ul>
Response	<ul> <li>P101 - If medical advice is needed, have product container or label at hand.</li> <li>P312 - Call a POISON CENTRE or doctor/physician if you feel unwell.</li> <li>P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337+P313 - If eye irritation persists: Get medical advice/attention.</li> <li>P302+P352 - IF ON SKIN: Wash with plenty of soap and water.</li> <li>P333+P313 - If skin irritation or rash occurs: Get medical advice/attention.</li> <li>P363 - Wash contaminated clothing before reuse.</li> <li>P304+P340 - IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing.</li> <li>P312 - Call a POISON CENTRE or doctor/physician if you feel unwell.</li> <li>P391 - Collect spillage.</li> </ul>
Storage	P410 - Protect from sunlight. Do not expose to temperatures exceeding 50 °C. P403+P233 - Store in a well-ventilated place. Keep container tightly closed. P405 - Store locked up.

Disposal P501 - Dispose of contents/container in accordance with local/regional/national/international regulation.

3. Composition / Information on Ingredients		
Component	CAS/ Identification	Conc (%)
Acetone	67-64-1	50-75%
4-Chlorobenzotrifluoride	98-56-6	22-40%
D-Limonene	5989-27-5	1-7%

ıy

4. First Aid

## **General Information**

If medical advice is needed, have product container or label at hand. You should call the National Poisons Centre if you feel that you may have been harmed or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).

Recommended first aid facilities	Ready access to running water is required. Accessible eyewash is required.
Exposure	
Swallowed	IF SWALLOWED: Immediately call a POISON CENTRE or doctor/physician. Do NOT induce vomiting.
Eye contact	IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Skin contact	IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/ attention. Take off contaminated clothing and wash before re-use.
Inhaled	IF INHALED: Remove to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTRE or doctor/physician if you feel unwell.
Advice to Doctor	

Treat symptomatically

Fire and explosion hazards:This product is an aerosol that releases flammad potential to cause fire or to create an additional f mixtues possible. Container may rupture/explode safe to do so. Leaking or burning cans should be necessary. Spontaneous or explosive reignition f area.Suitable extinguishing substances: Unsuitable extinguishing substances: Products of combustion:Carbon dioxide, extinguishing powder, foam, fog area.Products of combustion:Carbon dioxide, and if combustion is incomplete and other low-lying spaces, forming potentially e Self-contained breathing apparatus. Safety boots and eye protection.Hazchem code:Not applicable for Aerosol. Liquid has HazchemContainmentIf greater than 1000L is stored, secondary contai any potential spills must be in place. In all cases storm water.Emergency proceduresIn the event of spillage alert the fire brigade to lo hazard. Stop the source of the leak, if safe to do ignition. Wear protective equipment to prevent s area of any unprotected personnel. 7. Storage & Handling	
StorageKeep out of reach of children. Protect from sunlig exceeding 50°C. Store in a well ventilated, cool, and flame. Store locked up. Keep out of reach of children.	
Handling Keep exposure to a minimum, and minimise the section 8 with regard to personal protective equi contact and inhalation of vapour, mist or aerosol	
8. Exposure Controls / Personal Protective	oment requirements. Avoid skin and eye

## Workplace Exposure Standards

		as not been established by WorkSafe NZ for this product. mg/m <sup>3</sup> for inhalable particulates when limits have not othe	
NZ Workplace	Ingredient	<b>WES-TWA</b> *	WES-STEL
Exposure Stds	Acetone (bio)	500ppm, 1185mg/m <sup>3</sup>	1000ppm, 2375 mg/m <sup>3</sup>

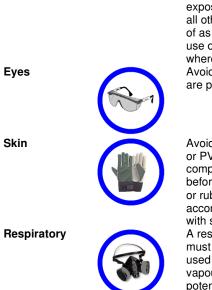

## **Engineering Controls**

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

## **Personal Protective Equipment**

General

Personal Protective Equipment (PPE) should not be used as the primary means of exposure protection, except in the event of an accident or emergency situation or where all other means of protection have proven to inadequate. Clean PPE after use or dispose of as appropriate. Store PPE for re-use in a clean place. Regular training on the correct use of PPE should be provided. In particular the correct fitting and use of respirators and where applicable the cleaning of respirators should be undertaken.

Avoid contact with eyes. Use safety glasses and or chemical splash goggles if splashes are possible. Select eye protection in accordance with AS/NZS 1337.

Avoid any skin contact. Wear overalls, rubber boots and impervious gloves. Nitrile, teflon or PVA gloves are recommended. Protective gloves or suitably resistant material must comply with AS 2161. Replace frequently. Gloves should be checked for tears or holes before use. Protective clothing must comply with AS 2919, AS3765.1 or AS3765.2. PVC or rubber boots must comply with AS/NZS 2210.2 and selected and maintained in accordance with AS/NS2210.1. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking.

A respirator when airborne concentrations approach the WES (section 8). Respirators must have filters appropriate to the duty and comply with AS/NZS1716 and selected, used and maintained in accordance with AS/NS 1715. Use a respirator with an organic vapour cartridge. If using a respirator, ensure that the cartridges are correct for the potential air contamination and are in good working order. Fit testing and clear guidelines and training for use and maintenance of PPE are necessary.

## **WES Additional Information**

#### Not applicable

	9. Ph	ysical & Chemical Properties
Appearance	thin, water-white	e liquid
Odour	solvent odour	
Odour Threshold	no data	
рН	no data	
Freezing/melting point	no data	
Boiling Point	56.1°C	
Flashpoint	-20°C	
Flammability	no data	
Upper & lower flammable limits	no data	
Vapour pressure	no data	
Vapour density	no data	
Specific gravity/density	0.899 g/mL	
Solubility	insoluble in wat	er
Partition coefficient	no data	
Auto-ignition temperature	no data	
Decomposition temperature	no data	
Viscosity	no data	
Particle Characteristics	no data	
	10.	Stability & Reactivity

# Stability & Reactivity

Stability Conditions to be avoided	Stable Flammable substance. Keep away from sources of ignition at all times. Containers should be kept closed in order to avoid contamination.
Incompatible groups Substance Specific Incompatibility	Oxidisers, strong acids, bases. none known
Hazardous decomposition products Hazardous reactions	Oxides of carbon

# Toxicological Information

#### Summary

IF SWALLOWED: can result in nausea, vomiting and central nervous system depression. If the victim is uncoordinated there is greater likelihood of vomit entering the lungs and causing subsequent acute effects such as chemical pneumonia, varying degrees of pulmonary injury or death.

IF IN EYES: may cause eye irritation.

IF ON SKIN: may cause skin irritation. Repeated or prolonged contact may cause drying out of the skin resulting in nonallergic dermatitis. Sensitised individuals may experience an allergic skin reaction. INHALED: high concentrations of vapours may cause dizziness and drowsiness.

11.

### **Supporting Data**

Acute	Oral	Using LD <sub>50</sub> 's for ingredients, the calculated LD <sub>50</sub> (oral, rat) for the mixture is between 2000 and 5000 mg/kg. Data considered includes: acetone 3000 mg/kg (mouse), 4-Chlorobenzotrifluoride 5546 mg/kg (rat), D-limonene 4400mg/kg (rat).
	Aspiration	This mixture is not considered an aspiration hazard.
	Dermal	Using LD <sub>50</sub> 's for ingredients, the calculated LD <sub>50</sub> (dermal, rat) for the mixture is $>5000$ mg/kg. Data considered includes: 4-Chlorobenzotrifluoride $>3300$ mg/kg (rabbit).
	Inhaled	Using LC <sub>50</sub> 's for ingredients, the calculated LC <sub>50</sub> (inhalation, rat) for the mixture is $>5,000$ ppm. Data considered includes: 4-Chlorobenzotrifluoride $> 32.03$ mg/l (rat).
	Eye	The mixture is considered to be an eye irritant, because some of the ingredients present are considered eye irritants in more concentrated form.
	Skin	The mixture is considered to be a skin irritant, because some of the ingredients present are considered skin irritants in more concentrated form.
Chronic	Sensitisation	The mixture is considered to be a contact sensitizer. D-Limonene is considered a skin sensitiser.
	Mutagenicity	No ingredient present at concentrations $> 0.1\%$ is considered a mutagen.
	Carcinogenicity	No ingredient present at concentrations $> 0.1\%$ is considered a carcinogen.
	Reproductive /	No ingredient present at concentrations > 0.1% is considered a reproductive or
	Developmental	developmental toxicant or have any effects on or via lactation.
	Systemic	No ingredient present at concentrations > 1% is considered a target organ toxicant. Inhalation of vapours may cause dizziness and drowsiness.
	Aggravation of existing conditions	None known.

# 12. Ecological Data

### Summary

This mixture may be toxic towards aquatic organisms with long lasting effects and harmful towards soil organisms.

Supporting Data	
Aquatic Bioaccumulation Degradability Soil Terrestrial vertebrate Terrestrial invertebrate Biocidal	Using EC <sub>50</sub> 's for ingredients, the calculated EC <sub>50</sub> for the mixture is between 1 mg/L and 10 mg/L. Data considered includes: 4-Chlorobenzotrifluoride LC <sub>50</sub> : 3mg/L (96h, Danio rerio (zebra fish)), EC <sub>50</sub> : 2mg/L (48h, Daphnia magna), NOEC: 0.41mg/L (72h, Pseudokirchneriella subcapitata (green algae)) D-limonene 0.702 mg/l (96hr, fish), 0.421mg/L (48 hr, Crustacean), 0.719 mg/L (72hr, Algal). No data No data This mixture may be harmful to the soil environment. D-Limonene is classed 9.2B by EPA. This mixture is not classed as 9.3. See acute toxicity. No evidence of toxicity towards terrestrial invertebrates. no data
	13. Disposal Considerations
Restrictions	There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.
Disposal method	Disposal of this product must comply with the Hazardous Substances (Disposal) Notice 2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore rendered non-hazardous before discharge to the environment.

**Contaminated packaging** Disposal of contaminated packaging must comply with the Hazardous Substances (Disposal) Notice 2017 clause 12. Ensure that the package is renedered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible reuse or recycle packaging.

## 14. Transport Information

	Dangerous Goods 2005		
Transport according to <b>UN number:</b>	NZS 5433 (Transport of Ha 3501	azardous Substances on Land). Cor Proper shipping name:	nsidered a dangerous good for transport. CHEMICAL UNDER PRESSURE, FLAMMABLE, N.O.S. (Acetone, Perchlorobenzotrifluoride)

Class(es)	2.1	Packing group:	NA
Precautions:	Flammable aerosol	9 9.00p.	
	15.	Regulatory Information	

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002515, Aerosols (Flammable) Group Standard 2020 . All Ingredients appear on the NZIoC.

#### **Specific Controls**

Key workplace requirements are:	
SDS	To be available within 10 minutes in workplaces storing any quantity.
Inventory	An inventory of all hazardous substances must be prepared and maintained.
Packaging	All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been supplied
Labelling	Must comply with the Hazardous Substances (Labelling) Notice 2017.
Emergency plan	Required if > 1000L is stored.
Certified handler	Not required.
Tracking	Not required.
Bunding & secondary containment	Required if > 1000L is stored.
Signage	Required if > 1000L is stored.
Location compliance certificate	Required if > 3000L is stored.
Flammable zone	Must be established if > 3000L is stored.
Fire extinguisher	If > 3000L present.
<b>N I I I I I I I I I I</b>	

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.

### Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.
